GRADE 7 SCIENCE CLASS

A hydraulic device uses liquids to transmit pressure equally from one point to another. Here, Mr. Streight's Grade 7 science students are building hydraulic devices out of popsicle sticks, syringes and tubing.

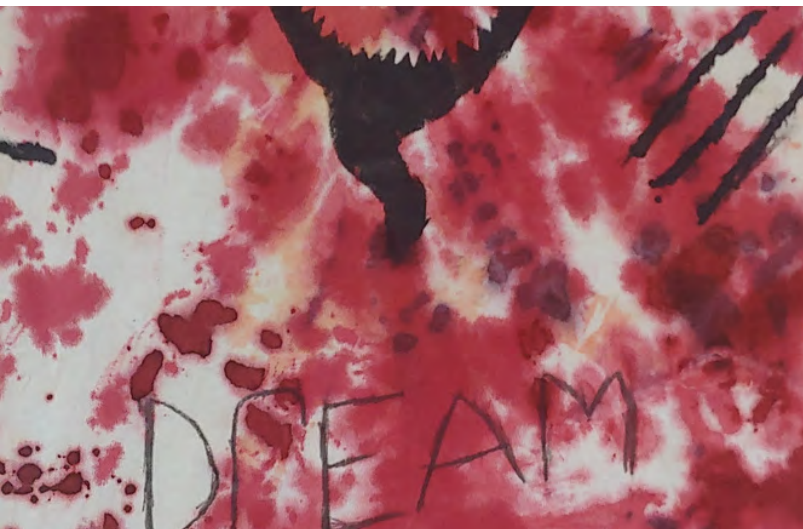

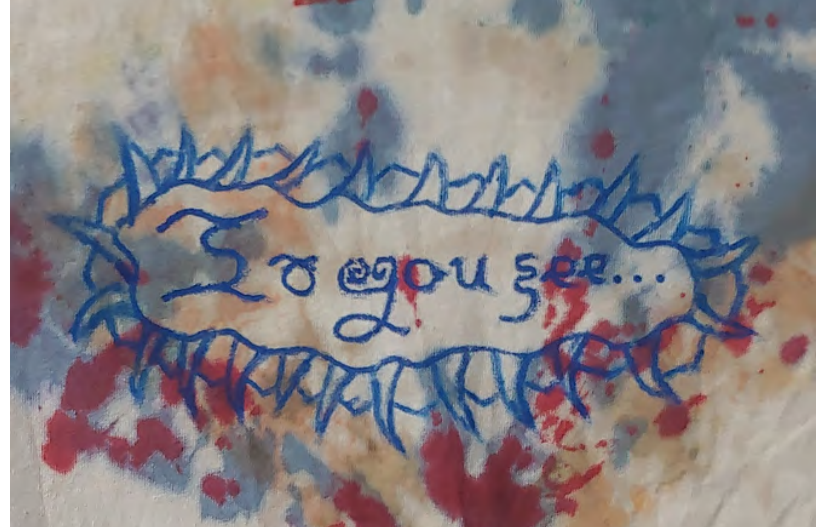

Did you know:

- Nickels, pennies, quarters and dimes are made on hydraulic presses.
- Hydraulic systems do not create new energy. They simply transform existing energy into a different form.
- Oil is pushed through the hydraulic system, not pulled. This is a common misconception, but now you know!

ART

The Grade 7 Art Class did tie-dye t-shirts incorporating our School's motto, Dream, Big Work Hard, Be Nice. We have some very creative students here at Leahurst!

CBC MUSIC CONTEST

This year the students chose to perform "Wonder" by Shawn Mendes

Click to hear the incredible performance of our very talented students!

AROUND THE SCHOOL

For \$1 students could vote on which teacher they wanted to wear the "stache" - of course, it had to be a 'COVID-19 style mustache'!

Mr. Mercer grew his own!
All money raised will go to Men's Health - The Movember Organization.

Thank you everyone!

The Grade 5/6s have brought in their own class pets, creating a hotel for monkeys. These monkeys get plenty of exercise with the students during break time.

GREEN CLUB

It was a lovely day for a hike in Little Catawaqui Creek Conservation Area with the Green Club.

Hour of consciousness

How is Meursault allegorically presented as Sisyphus in *The Outsider*?

Religion
 "He took out a silver crucifix and brandished it at me as he came close. And in a completely different voice, almost quivering he shouted: 'Do you know who this is?' I said: 'Yes, of course.'"

Formalities
 "Yes, the gentlemen of the jury will indeed take it into account. And they will come to the conclusion that a stranger might offer a coffee, but that a son should refuse it when in the presence of the dead body of the woman who brought him into this world."

Love
 "Why marry me then?" she asked. I explained that it was of no importance whatsoever but if that was what she wanted, we could get married."

Friendship
 "He asked me again if I'd like to be his friend. I told him I didn't mind; he seemed pleased."

Passion for life

"I was thinking about how wonderful it was to be out in the sun and how good it felt. The sand was starting to feel warm under my feet."
 "The sound of the waves was even more languorous, calmer than at midday. It was the same relentless sun, the same light on the same sand"
 "I thought about the cool water behind the rock I wanted to return to the soft sound of the water, wanted to find peace once more in the shade."
 "I could see all of the sky above me, blue and golden. I could feel Marie's stomach under my neck, moving gently as she breathed."
 "I picked up an old newspaper and read it. I cut out an ad for Kruschen Salts and glued it into an old notebook where I keep things from the papers I find amusing"

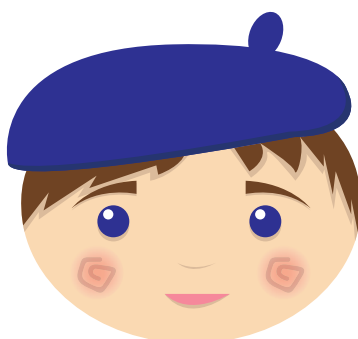

Grade 11 English isn't just essay writing, as evidenced in this eye-catching conversation assessment image created by Kara.

WINTER COFFEE HOUSE

December 15th - Afternoon

There will be a Senior Coffeehouse and a Junior Coffeehouse.

If you are interested in performing and have not already signed up please contact Ms. Leonard or Ms. Murphy.

Congratulations!!

The book drive was a great success, with the Grade 5/6 class winning a pizza lunch after donating 478 books!

All in all, the whole school donated a total of **1591** books.

The books will be donated to charities in need and delivered by our local Interact Group.

Great job everyone!

Did you know:

- The most expensive book in the world is Codex Leicester by Leonardo Da Vinci. It was purchased by Bill Gates for 30.8 million dollars.
- To write a novel, it takes around 475 hours.
- There is an actual word for loving the smell of old books; it's "bibliosmia".
